

Apption Corp.

Enterprise Application Modernization

About Apption

“Senior Management indicated that the new (Apption) system is regarded as one of the most significant transformations for our organization in the last 10 years”
- Canadian Human Rights Commission

Apption is an award-winning software consulting and solution delivery firm that specializes in modernizing enterprise and government infrastructures through Service-Oriented Architecture (SOA) and Embedded Analytic solutions.

Why Apption ?

Technical Expertise

Enterprise: Java EE, Microsoft .NET, SOA, XML, Oracle & SAP Applications, SQL Server, MySQL, Mobile Development

Web / Cloud: User Experience Design, Python/Django, Ruby on Rails, Amazon Web Services, Google AppEngine

Algorithmic: Machine Learning, Classifiers, Multi-variate Analysis, Computational Linguistics, Hadoop, MapReduce, HBase

We are industry leaders in the application modernization and intelligent system arena, with a speciality in the design and development of shared services environments. Along with a long list of satisfied clients, we have received industry recognition as the winner of the 2008 Microsoft Code Award for Best Team Development in Canada and as a finalist for the 2009 Amazon AWS award for cloud computing expertise. Apption was also named in 2008 and 2009 as the Profit Magazine’s Hot 50 List of emerging growth companies in Canada. We received the 2006 Branham 300 Technology Award and in 2009, further recognition with the Ernst and Young Entrepreneur of the Year award.

Our Clients

Apption’s large and growing client base includes government, private enterprise, universities and SMBs. Some examples of satisfied customers include: Canada Post, Alcatel-Lucent, Hertz, and numerous other projects within the Government of Canada.

Alcatel-Lucent

Apption Corp.

Enterprise Application Modernization

“The biggest concerns when modernizing legacy systems are risk and cost. What makes Apption unique is our ability to effectively modernize any legacy application and any platform or database. Our proven methodology reduces your project risk while retaining your key business and data assets. “

- Sam Zaid, CTO

Apption’s Application Modernization Offering

Our enterprise application modernization offering allows organizations to free themselves from the cost, risk and frustration of inefficient, inflexible and outdated software applications. We do this economically and with minimal disruption to your business. Using our industry recognized expertise in SOA frameworks, and our Five-Step Modernization Solution approach, we’ll create new easily maintainable systems that help you drive efficient processes, strategic directions and employee satisfaction.

Our Five-Step Modernization Solution

1. Business Architecture - Understanding present tactical needs and future strategic directions
2. User Research - Observing employees using existing applications and mapping out business processes and rules
3. Solution Development - Prototyping, architecting, and developing solutions incrementally to meet both immediate business needs and long-term objectives
4. Data Integration - Enabling new solutions to access all the useful data trapped in aging applications
5. Knowledge Transfer - Training your staff to ensure you are self-sufficient and productive

Modernization Areas

- ❖ Enterprise Reporting
- ❖ Database Integration
- ❖ Business Process Automation
- ❖ Composite Applications
- ❖ Supply Chain Management
- ❖ Business Intelligence
- ❖ Customer Relationship Management

Case Study

Agriculture Canada had been working with a system that was built using mid-1990’s technology. Being integral to daily business operations, over time the system was not able to serve new urgent business requirements. Incumbent system vendors advocated a multi-million dollar system upgrade that could help, but would fall short of exact requirements and timeframe. Apption was instead chosen to provide a solution.

Following our 5-step Modernization Solution, Apption developed a better risk-managed replacement solution taking advantage of the latest in proven software technology. The solution seamlessly integrated new financial and project systems, based on a shared services framework, meeting both immediate requirements and long-term objectives.
